  - 7.2. Additional, optional services

## Safety/quality/environmental protection

### We contribute to the good image of the site

In recent years, the Leuna site has become synonymous with safe and environmentally conscious work. We feel we have to do something to maintain this; therefore, we offer you a comprehensive service package including prevention of emissions and radiation, laser protection and standards. As external officer, we can very effectively relieve our customers of these time-consuming tasks.

We gladly accept the role of external waste officer, for those customers who wish so.

If you run plants which are affected by the regulations pertaining to malfunctions/accidents, we can co-ordinate cross-company safety management and can become your external malfunction/accident officers.

Our skilled safety engineers can undertake all tasks and obligations regarding adherence to works safety and protection regulations which your organization is obliged by law to abide by.

### **1. Works safety service**

For example:

Consulting and support in occupational safety and accident prevention with all appearing questions;

Safety checks of plant, facilities and at the work place;

Advising of management and staff;

Accident prevention measures, investigation of accidents and handling of accident announcements;

Leading preparation of security policies;

Resultant tasks in handling of hazardous goods and preventative measures.

### **2. Co-ordination of safety management**

Tasks of safety co-ordination:

Continual briefing of company accident/malfuction officer (such as information on amendments to laws and statutes) and co-ordination of problems and safety measurements with cross-company relevance;

Organization and co-ordination of site accident prevention training;

Preparation and updating of the informal alarm and emergency plan of the chemical site Leuna based on the company-specific alarm and emergency plans of the companies located on site;

Creation of a unified information material for the entire Leuna site in accordance with paragraph 11 of emergency regulation ("Störfallverordnung") via the collection and integration of customers information material;

Organization of public relations work in response to an incident.

### **3. Radiation protection**

#### **3.1. Basic services**

Instruction and advising of staff and those working with radiation prevention for the customer, in capacity;

Undertaking of all tasks involving authorities including permit applications and announcements;

Contamination measurements and decontamination work;

Implementation of disposal measures for radioactive material.

#### **3.2. Services**

Complex services for radioactive sources;

## Safety/quality/environmental protection

Personal dosimetry;

Training, with documentation, in the area of radiation prevention.

### **4. Standards committee**

InfraLeuna is representative of the DIN-group solution for the chemical site;

Procurement of standards and guidelines;

Support with establishing standard portfolios as well as updating standards portfolios/document collection.

### **5. Emission prevention**

#### **5.1. Cross-company service on the basis of BImSchG**

Keeping of records for registry in the case where BImSchG requires a given plant to have a permit: planning and realization of plant registry for the site

Execution of noise protection of the Chemical Site.

Provision of general environmental data;

#### **5.2. Tasks carried out in accordance with § 54 BImSchG as external emissions control officer**

Advice on plants requiring permits;

Preparation and professional instruction and support during inspections and hearings of the supervisory authorities;

Conception of emissions report according to regulation 11. BImSchV.

#### **5.3. Additional, optional services**

Advice on planning of industrial plants to carry out the approval procedure with BImSchG;

Advice on implementation of environmental examination according to EC ecological regulations or DIN ISO 14001.

### **6. Prevention of water pollution**

#### **6.1. Cross-company site service based on the law pertaining to water quality (WHG)**

Provision of data concerning water;

Briefing of company staff on subject of waste water pollution and its reduction.

## **6.2. Tasks carried out in accordance with § 65 WHG as external water protection officer**

Monitoring of compliance with regulations and statutes pertaining to water pollution prevention;

Representation of the site before authorities in the area of water pollution problems.

## **6.3. Additional, optional services**

Co-operation concerning or complete management of registry for waste water, permit applications and announcements, for example, for water extraction and waste water submission;

Calculation of waste water charge and preparation of applications in compliance with waste water regulations;

Training and educational measures.

## **7. Recycling and waste disposal**

### **7.1. Tasks carried out in accordance with regulation § 55 of the German law pertaining to recycling and waste disposal as external waste disposal officer**

Monitoring of compliance with statutory regulations and fulfilling of tasks and obligations;

Monitoring of process from waste creation up to disposal or recycling.

### **7.2. Additional, optional services**

Cooperation with the construction of disposal and destruction proof;

Training and educational measures;

Cooperation with the construction of waste balances.
